## TalkSwitch<sup>®</sup> IP telephones

### Advanced features and easy operation

Looking for line appearance, teleworker extensions that work just like local extensions and advanced programmability? TalkSwitch<sup>®</sup> IP phones are the answer. They're loaded with advanced features and configure themselves automatically. And because they plug into your computer network, you don't need to run phone wiring to each desk.

### Line appearance

Need to see which lines are in use and which are free? For employees who require line appearance, the TS-550i, TS-350i and the TS-9143i fit the bill.

### External IP extensions

Plug your TalkSwitch IP phone in anywhere and it can function just like your extensions in the office. It's the perfect solution for teleworkers or employees who split time between the office and their home office. Requires a VoIP-enabled TalkSwitch system and broadband Internet access.

### Phone freedom

TalkSwitch never ties you down. In addition to our IP phones, we offer a complete line of analog phones. TalkSwitch systems also work with standard analog and selected IP phones from other manufacturers, so you can get the phones you want or save money by using your existing phones.

### TS-550i

Our best phone to enhance productivity.
